

30 DAYS QUARANTINE IN AUSTRALIA.

Further advice can be found at www.aqis.gov.au or by e-mail at animalimp@aqis.gov.au or by ph +612 6272 4454 or by fax +612 6272 3110

SUMMARY

All animals entering Australia require an import permit, issued by AQIS. To obtain an import permit, an application to import your pet must be completed. Your application must include your pet's microchip number. An import permit will be returned to you. The import permit contains Veterinary Certificate A and B which must be completed and endorsed by an Official Veterinarian in the country of export prior to the arrival of your pet in Australia. The steps below provide information for completing the entire import process.

The owner/importer must pay all [quarantine fees](#) associated with the import and [quarantine accommodation](#) of your dog or cat in Australia.

Updated February 2006

*check once
completed*

STEP 1: GENERAL ELIGIBILITY

Time Frame: Confirm eligibility before proceeding.

Residency: Dogs and cats must have been continuously living in the country of export for a minimum of 6 months immediately prior to shipment, or since direct importation from Australia (please see last page before proceeding), or since birth.

Your pet must not be under quarantine restriction at the time of export.

Age: Your pet must be at least 12 weeks old at time of export.

Pregnancy: Female pets must not be more than **3 weeks pregnant** nor be suckling young and **must be eligible for the minimum 30 days** in Quarantine at time of export.

Breed: Under the legislation of the Australian Customs Service (ACS) dogs of the following breeds are not eligible for importation into Australia. The ACS can be contacted on 61 2 6245 5484 or 1300 363 263

- dogo Argentino
- fila Brasileiro
- Japanese tosa
- Pit bull terrier or American pit bull
- Presa Canaria

Under the legislation of Department of the Environment and Heritage domestic/non-domestic animal hybrids eg bengal cats or wolf crosses are not eligible for import, unless they are proven to be 5th generation or more away from any pure-bred non-domestic ancestor. Please contact Wildlife Permits and Enforcement Section, The Australian Government Department of Environment and Heritage on 02 6274 1111 for further information.

STEP 2: MICROCHIP CAT OR DOG

Time Frame: As soon as possible. Before applying for a permit to import

Dogs and cats must be identified by a microchip that can be read by an Avid®, Trovan®, Destron® or other ISO compatible reader.

STEP 3: APPLY FOR A PERMIT TO IMPORT

Note: The AQIS import permits are only valid for 6 months from the day that AQIS receives your application.

Please fill out the application form and send it to:

AQIS - Live Animal Imports GPO Box 858 Canberra 2601 Australia	Fax 61 2 6272 3110 Phone 61 2 6272 4454
---	--

Your pet will not be allowed to enter Australia without a valid AQIS permit to import. You do not have to fill out the Rabies Vaccination and Rabies Neutralising Antibody Titre Test Declaration (RNATT) of the application form.

STEP 4: AQIS PERMIT TO IMPORT

Time Frame: An AQIS import permit will be sent to the person/company nominated on the application form immediately following approval by AQIS of your application.

You may request the import permit to be faxed; a copy of the import permit may be used.

The permit includes **Veterinary Certificates A and B**. This information sheet will take you through the steps required to complete these veterinary certificates. You may continue to prepare your pet/s for export before the AQIS import permit and veterinary certificates arrive.

The issuance an import permit does not guarantee a space at your preferred Quarantine Station. **Bookings must be made for your pet/s.**

To book a space at the Quarantine stations a permit number is required. In addition confirmation of bookings requires provision of an Airway bill number (Canada and USA are exempt).

STEP 5: FIND A GOVERNMENT APPROVED VETERINARIAN, AN OFFICIAL VETERINARIAN AND A GOVERNMENT APPROVED LABORATORY.

Time Frame: As soon as possible

An Official Veterinarian: is a government officer usually employed by the government veterinarian administration (eg in the UK - Department of Environment Food and Rural Affairs) in the exporting country. Official Veterinarians generally do not work in private

practice. Official Veterinarians are able to sign certificates on behalf of the government's veterinary administration. Official Vets endorse Veterinary Certificate A and complete Veterinary Certificate B that are provided with your AQIS import permit. The Official Veterinarian will also help you find a "government approved vet" and a "government approved laboratory".

A government approved vet: You should call the Official Vet, or quarantine administration or veterinary administration in your country to determine which vets you can use to prepare your pet for export. This government approved veterinarian will prepare your pet for export to Australia and fill in the details of this preparation on Veterinary Certificate A provided with your AQIS import permit.

Government approved laboratories: are approved by the government veterinary service for testing samples from animals destined for export. AQIS allows the use of Government approved laboratories in countries other than the country of export. If you wish the [Australian Animal Health Laboratory](#) (AAHL) can do all testing for you. Fax: 613 5227 5555 Ph: 613 5227 5329

To locate appropriate veterinarians and laboratories, contact the government quarantine, agriculture or food departments in the country of export. Alternatively, contact AQIS.

STEP 6: COMMENCE TRAVEL ARRANGEMENTS

Time frame: As soon as you have received the import permit from AQIS.

Your pet can only come into Australia through the following airports, Mascot Airport in Sydney (New South Wales) **or** Tullamarine Airport in Melbourne (Victoria) **or** Perth Airport in Perth (Western Australia).

AQIS does not place any restrictions on the airline you choose to use, however your pet must travel as "Manifested Cargo" (not in the cabin) and in an International Air Transport Association (IATA) approved container for dogs and cats. Strict compliance with container specifications is vital for the safe and secure transport of your animal. Problems **will occur** if your pet can escape from this container or if any part of its body (nose, limbs, or tail) can protrude. Your airline can help you with these requirements.

During transport to Australia pets may transit (touch down but stay on the same plane) any country en-route. Pets may trans-ship (change aircraft or vessel) through Amsterdam, Frankfurt, Copenhagen airports or any country recognised by AQIS as rabies free (i.e. AQIS category 1,2,3A or 3B countries). Trans-shipment may also require approval from the quarantine authority in the country of trans-shipment. AQIS strongly advises booking direct flights due to health and welfare concerns, eg pets missing connecting flights and remaining in airports for extended periods.

If you are not able to organise travel yourself there are animal transport agents in most countries who can make arrangements on your behalf.

Please note you will be charged an additional fee of \$25 if your pet arrives in Australia outside business hours (8:00am - 4:00 PM). You are also required to seek the approval of the relevant quarantine station for after hours pick-ups prior to import.

AQIS accepts no responsibility for animals that escape en route, and all transport costs are at the expense of the importer.

STEP 7: GENERAL VACCINATIONS

Time frame: Between 1 year and 14 days prior to export.

Vaccinations must be valid for the entire period spent in quarantine in Australia. If vaccinations expire prior to your pet's release from quarantine they may be re-vaccinated at the owner's expense.

Dogs must be vaccinated against distemper, infectious hepatitis, canine parvovirus (parvo), para-influenza and *Bordetella bronchiseptica* (kennel cough). If the *Bordetella bronchiseptica* (kennel cough) is not available in the country of origin, dogs may be vaccinated for kennel cough on arrival in Australia at the owner's expense. **Note:** Vaccinations against *Leptospira interrogans*.var. *canicola* is not recommended within 6 months of export as your pet's high antibody response will most likely result in it being ineligible for export to Australia.

Cats must have been vaccinated against feline enteritis (feline panleucopenia, feline distemper), rhinotracheitis and calicivirus.

dogs only

STEP 8: DOGS ONLY - BRUCELLOSIS, EHRLICHIOSIS, LEPTOSPIROSIS AND EXTERNAL PARASITES

Time frame: Within 30 days of export.

Blood tests: Arrange for a government approved veterinarian to scan your dog's microchip and draw blood samples for brucella and ehrlichia (tropical canine pancytopenia) and leptospira. Your dog's microchip number must be recorded on the blood tube and on the laboratory submission form. Send blood to a government-approved laboratory for testing. The laboratory report must link your pets' microchip number to the result. If there is no microchip number on the laboratory report your pet/s may be re-tested whilst in Quarantine.

These results must be recorded on Veterinary Certificate A. All laboratory test results must be endorsed by an Official Veterinarian and accompany your pet to Australia. Contact AQIS if your dog does not meet the requirements of these tests.

Brucellosis: Your dog/s must be tested for *Brucella canis* infection by a serum agglutination test. The test must produce a negative result. Once blood is collected for this test your dog must not be mated or inseminated prior to export to Australia.

Leptospirosis: Dogs must be tested for *Leptospira canicola* by a microscopic agglutination test within 30 days of export.

Dogs that record a negative result (less than 50% agglutination at a serum dilution of 1:100) are eligible for import.

Dogs that record a positive result of not more than 1:400 must be **re-tested** 14 days or more after the first test. The second test must not show an increase in titre above the first test.

Dogs that record a result of over 1:400 are ineligible for import.

Note: Vaccinations against *Leptospira interrogans*.var. *canicola* is not recommended within 6 months of export as your pet's high antibody response will most likely result in it being ineligible for export to Australian

Ehrlichiosis: Your dog/s must be tested for *Ehrlichia canis* infection by the indirect fluorescent antibody test. The test must produce a negative result at a dilution at 1:40. Your pet must be treated for external parasites within 24 hours of blood being taken for this test.

Treatment for external parasites

Note: You will have to commence treating your pet/s for external parasites at the same time as taking blood for ehrlichia as this disease is spread by ticks.

A government approved veterinarian must treat your dog with a long lasting acaricide that is registered for the control of ticks and mites eg Frontline® or Permethrin®. Oral products and medicated collars are not satisfactory, neither are products that kill ticks only after biting your animal. Washes and rinses that prevent ticks and tick bites are acceptable. The treatment must be **repeated** according to the manufacturer's instructions in order to prevent infestation with ticks and mites from the first application until export.

Dates of treatment will need to be recorded on Veterinary Certificate A.

*Dogs which
have lived in
Africa only*

STEP 9: DOGS THAT HAVE LIVED IN AFRICA ONLY, BABEOSIS

Time frame: within 28 days of export.

Note: This treatment should not be given within 48 hours of treatment for external parasites as side-effects may be increased.

Option 1: A government approved veterinarian must treat your dog **once** with imidocarb dipropionate (Forsay-65®, Hoechst or Imizol® by Coopers) at a rate of 7.5 mg per Kg body weight by subcutaneous injection.

Option 2: A government approved veterinarian must treat your dog **twice** with imidocarb dipropionate (Forsay-65®, Hoechst or Imizol® by Coopers) at a rate of 6.6 mg per Kg body weight by subcutaneous injection given two weeks apart.

Details of treatment(s) must be recorded on Veterinary Certificate A.

STEP 10: INTERNAL AND EXTERNAL PARASITE TREATMENT

Time frame: Within 4 days of export. This can be done at the same time as the completion of Veterinary Certificate A.

External parasites:

For dogs: You must have already commenced external parasite treatment for dogs. Your dog/s may require repeat treatment for external parasites and will need to be treated for fleas.

For cats: Cats must be treated with a product approved for the treatment of ticks and fleas. Oral products, injections and medicated collars are not satisfactory neither are products that rely on the tick biting your pet. Washes and rinses that prevent ticks and tick bites are acceptable.

The active ingredient, dose rate and treatment date must be recorded on Veterinary Certificate A.

Internal parasites: Cats and/or dogs must be treated with a product approved for the treatment of nematodes and cestodes eg Drontal ®.

The active ingredient, dose rate and treatment date must be recorded on Veterinary Certificate A.

STEP 11: COMPLETION OF VETERINARY CERTIFICATE A,

INCLUDING PRE-EXPORT INSPECTION

Time frame: Within 4 days of export.

Please read over Veterinary Certificate A prior to the appointment. You will have to bring your pet/s and all documentation to this inspection. Your pet will be required to be free from clinical signs of infectious or contagious diseases, external parasites and be fit to travel.

Veterinary Certificate A is to be completed by a government approved or an Official Veterinarian.

Any corrections to Veterinary Certificate A will only be accepted if the original entry has been struck through and remains legible – white out must not be used. An Official Veterinarian must sign each correction.

STEP 12: COMPLETION OF VETERINARY CERTIFICATE B, SEALING ANIMAL IN THE SHIPPING CONTAINER.

Time frame: After the completion of Veterinary Certificate A, usually on the day of departure.

The following documents must be presented to the Official Veterinarian at this time for signature and stamp (endorsing) and then travel with your pet/s to Australia.

- Original or copy of the AQIS import permit
- Completed Veterinary Certificate A for endorsement by Official Veterinarian.
- Veterinary Certificate B for completion and endorsement by the Official Veterinarian
- General vaccination certificates for endorsement by the Official Veterinarian.
- Brucellosis, Ehrlichiosis, and Leptospirosis laboratory reports (dogs only) for endorsement by the Official Veterinarian

Copies may be used but the paperwork arriving in Australia with your pet must bear original signatures and stamps.

The Official Veterinarian who signs Veterinary Certificate B must record the identification number of the seal on Veterinary Certificate B, and seal your pet into the cage. Under no circumstances must your pet be released from its cage once sealed. Ensure your pet is prepared for travel before the cage is sealed.

A water container should be fixed inside the cage. An external funnel with a hose leading into the water container should be provided to allow water to be replenished without opening the cage. Sufficient absorbent bedding should also be provided (soiled bedding may be destroyed on arrival in Australia). The container should also be marked “Live Animal”.

Corrections to Veterinary Certificate B will only be accepted if the original entry has been struck through and remains legible – white out must not be used. The Official Veterinarian must sign each correction.

STEP 13: CHECK PET IN WITH THE AIRLINE

Time frame: Please check with your airline.

In most cases your pet/s will be checked in at the freight terminal, not the passenger terminal.

The import permit, Veterinary Certificates A and B, blood test results and vaccination records must travel to Australia with your pet/s. These documents may be originals or copies but must bear the original signature and stamp of the Official Veterinarian.

Please make photocopies of all documents. AQIS recommends taping one set of photocopied documents onto the cage while keeping another set with you.

If, in exceptional circumstances, your pet's container must be opened during transit or transshipment it should be resealed and a certificate provided to AQIS by an Official Veterinarian, port authority, or captain of the aircraft detailing the circumstances. Instructions to this effect should be attached to the outside of the container before departure from the port of export.

ON ARRIVAL IN AUSTRALIA

On arrival your pet will be met by AQIS staff and transported to the quarantine station. AQIS provides housing, bedding, food, water and care for your pet for the duration of its stay. All quarantine costs must be met by the importer, an invoice for these charges will be posted to you after arrival of your pet in Australia and must be paid prior to release of your pet (cheques take 2 weeks to clear).

Should your pet require veterinary care, AQIS will contact you and arrange for a private veterinarian to visit your pet. Private veterinarians will charge you directly.

HEARTWORM - Dogs

Please note that heartworm disease of dogs is endemic in Australia. Heartworm is caused by the microorganism *Dirofilaria immitis* and is spread by mosquitoes. No testing or treatment is required for importation into Australia, however drugs are available on arrival to prevent heartworm.

If you would like your dog to be placed on heartworm medication please contact the quarantine station and they can refer you to a private veterinarian to organise preventative treatment for your pet. The private veterinarian will bill you separately for this service.

DOGS AND CATS RETURNING TO AUSTRALIA AFTER LESS THAN 6 MONTHS RESIDENCY IN COUNTRY OF EXPORT

Australian dogs and cats may be eligible to return to Australia with less than 6 months residency in the country of export if the following criteria can be met.

Prior to leaving Australia dogs and cats must be identified by a microchip that can be read by an Avid®, Trovan®, Destron® or other ISO compatible reader. OR Your pet must have remained under quarantine control eg in a quarantine kennel in the UK, since arrival from Australia. Certification to this effect will be required at the time of applying for an import permit.

You must be able to provide AQIS with sufficient evidence at the time of applying for an import permit to demonstrate that that your pet has been exported from Australia. For example AQIS will require export documentation from Australia and import documentation into the country from which your pet will now be exported which links your pet by way of its microchip number to these movements.

AQIS QUARANTINE FEES – CATS AND DOGS

The total fee for quarantine service is calculated after your pet arrives in Australia, you will be invoiced for these services. The total of the invoice is payable prior to collection of your animal/s from quarantine. AQIS will accept cash, visa, MasterCard, Amex or bankcard. Payment by cheque must be received at least 14 days prior to collecting your pet/s.

Service	Notes	Fee \$AUD
Quarantine entry	Fee is charged for each animal	\$10
Veterinary Inspection	Fee per half hour. In the majority of cases only half an hour is required. This fee is charged for each animal.	\$71
Document clearance	Fee charged for audit of your pets veterinary certificates A & B. This fee is charged for each animal. This fee may be repeated if additional information is required.	\$27.00
Transport from the airport to the quarantine station.	Fee is charged for the first animal only. Pets picked up after 4pm or before 8am are charged at the higher rate	\$95 or \$120
Accommodation of a cat	Daily rate for the first cat - includes food and care.	\$13.55
Accommodation for each additional cat, sharing accommodation with the first cat	Daily rate for subsequent cats – includes food and care.	\$10.55
Accommodation of a dog	Daily rate for the first dog – includes food and care.	\$17.55
Accommodation for each additional dog, sharing accommodation with the first dog	Daily rate for subsequent dogs – includes food and care.	\$12.55
A dog that gives birth	\$400 for the first 7 hours or less of supervision plus \$19 for each additional hour of supervision.	\$400
Puppies less than 6 weeks old	Daily rate per pup. After the puppies are 6 weeks old they are charged at the daily rate for dogs.	\$5
A cat that gives birth	Fee for supervision of birthing cat. Kittens are not charged for until they are over 6 weeks old. After the kittens are 6 weeks old they are charged at the daily rate for cats.	\$300
Any additional veterinary care	Additional veterinary care eg booster vaccinations are provided by a private veterinarian.	Charged to the owner by private veterinarian.

AQIS APPROVED COUNTRIES

APPROVED RABIES-FREE COUNTRIES AND TERRITORIES REQUIRING NO QUARANTINE

Cocos (Keeling) Islands, New Zealand, Norfolk Island.

APPROVED RABIES-FREE COUNTRIES AND TERRITORIES - MINIMUM OF 30 DAYS QUARANTINE (Information sheet 2)

Bahrain, Barbados, Cyprus, Falkland Islands, Fiji, French Polynesia, Guam, Hawaii, Iceland, the Republic of Ireland, Japan, Malta, Mauritius, New Caledonia, Norway, Singapore, Sweden, Taiwan, the United Kingdom, Vanuatu.

APPROVED RABIES-FREE ISLAND COUNTRIES AND TERRITORIES - MINIMUM OF 60 DAYS QUARANTINE (Information sheet 3)

American Samoa, Federated States of Micronesia, Kiribati, Papua New Guinea, Solomon Islands, Wallis and Futuna, Western Samoa.

APPROVED RABIES-FREE ISLAND COUNTRIES AND TERRITORIES WHICH MAY NOT HAVE AN OFFICIAL VETERINARY SERVICE - MINIMUM OF 60 DAYS QUARANTINE (Information sheet 3)

Christmas Island, Cook Islands, Kingdom of Tonga, Nauru, Niue, Palau, Tuvalu.

APPROVED COUNTRIES AND TERRITORIES RECOGNISED BY THE AUSTRALIAN GOVERNMENT AS COUNTRIES AND TERRITORIES IN WHICH DOG-MEDIATED RABIES IS ABSENT OR WELL CONTROLLED - MINIMUM OF 30 DAYS QUARANTINE & RABIES VACCINATION (Information sheet 4)

Antigua and Barbuda, Argentina, Austria, Bahamas, Belgium, Bermuda, British Virgin Islands, Brunei, Bulgaria, Canada, Cayman islands, Chile, Croatia, Czech Republic, Denmark, France, Finland, Germany, Greece, Greenland, Hong Kong, Hungary, Israel, Italy, Jamaica, Kuwait, Luxembourg, Macau, Peninsular Malaysia, Monaco, Montenegro and Serbia, Netherlands, Netherlands-Antilles and Aruba, Poland, Portugal, Puerto Rico, Qatar, Reunion, Sabah, Saipan, Sarawak, Seychelles, Slovenia, South Korea, Spain, St Kitts and Nevis, St Lucia, St Vincent Grenadin, Switzerland (including Liechtenstein), Trinidad and Tobago, United Arab Emirates, United States of American (not including Hawaii), US Virgin Islands, Uruguay.

APPROVED COUNTRIES AND TERRITORIES RECOGNISED BY THE AUSTRALIAN GOVERNMENT AS COUNTRIES AND TERRITORIES IN WHICH DOG-MEDIATED RABIES IS ENDEMIC (Information sheet 5)

Republic of South Africa

Importation of dogs and cats from non-approved countries can only occur indirectly via an approved country where the animal must be continuously resident for at least the six months immediately prior to export to Australia. The animal is then eligible for import under the conditions that apply to that approved country.

*Checklist for Application Form for a Permit to
 Import Cats and Dogs into Australia*

COMMONWEALTH QUARANTINE ACT 1908, Section 13

Please complete this checklist prior to forwarding your application to AQIS, to ensure all information is completed correctly.

<p>Importer Details - Person who is responsible for animal. An invoice will be sent to this person. Must be an Australian address with Australian phone contact details. Can be owner or owner's representative eg. c/- relative, friend or workplace.</p> <p>A PO BOX Address or TO BE ADVISED is not acceptable.</p>	<input type="checkbox"/>
<p>Exporter Details - Person in country of export responsible for preparing the animal for export. Contact phone number and/ or email address must be provided.</p>	<input type="checkbox"/>
<p>Description of Animal</p> <ul style="list-style-type: none"> • Animals Name - The name the animal will respond to, rather than a pedigree. • Age or Date of Birth • Breed • Sex • Microchip details 	<input type="checkbox"/>
<p>Country of Export – Country where the animal has been living for the 6 months directly prior to export to Australia.</p>	<input type="checkbox"/>
<p>Quarantine Accommodation - Specify the preference of the quarantine station to accommodate your pet.</p>	<input type="checkbox"/>
<p>Animals sharing quarantine accommodation - Please complete if you wish your animal to share kennels with another animal owned by you.</p>	<input type="checkbox"/>
<p>Approved Import Permit – Only one copy of the permit will be posted or faxed. <u>Please tick one box only.</u></p>	<input type="checkbox"/>
<p>Payment of Application Fee - Payment must be included as either cheque or by credit card payment form.</p>	<input type="checkbox"/>
<p>Rabies Vaccination and Rabies Neutralising Antibody Titre Test Declaration (RNATT) - Must be completed for Category 4 and 5 countries. This form must be signed and stamped by an Official Veterinarian in the country of export, NOT a government approved veterinarian.</p> <p>RNATT laboratory report – From a government approved laboratory, with the microchip number consistent with the Rabies Vaccination and Rabies Neutralising Antibody Titre Test Declaration (RNATT) and the application.</p>	<input type="checkbox"/>
<p>The completed application should be posted or faxed to AQIS - Live Animal Imports in Canberra. Please submit your application only once either by fax, post or email.</p>	<input type="checkbox"/>

***Application for Permit to Import Cats and Dogs into
 Australia***
 COMMONWEALTH QUARANTINE ACT 1908, Section 13

The most current information including [approved country lists](#) can be obtained via the Internet at www.aqis.gov.au or by e-mail at animalimp@aqis.gov.au

- Please complete one form for each cat or dog.
- The application fees are \$280 for the first animal, plus \$60.00 for each additional animal.

Total number of cats and dogs	Application fee for import permit (AUD)
One	\$280
Two	\$340
Three	\$400
Four	\$460
Five	\$520

- Please include your payment with the application.
- If sending a cheque, your application should be posted. If paying by credit card you may post or fax your application. Cheques are payable to the “Collector of Public Monies-AQIS” - Amex, Visa, Mastercard and Bankcard are accepted.
- The completed application should be posted or faxed to AQIS - Live Animal Imports in Canberra.

AQIS - Live Animal Imports GPO Box 858 Canberra 2601 Australia	Fax 61 2 6272 3110 Phone 61 2 6272 4454
---	--

- AQIS will post import permit/s (including veterinary certificates A and B) to the exporter, within two weeks of receiving your application/s. Please allow time for international mail delivery. Import permits can be also be sent by fax or to an alternative address when specified at the time of application.
- Pets are only eligible to travel to Australia with a valid AQIS import permit and when all conditions provided on the AQIS import permit have been met.
- The owner/importer must pay all quarantine fees associated with the import and quarantine accommodation of pet/s.

Importer details, Exporter details, Animal details including microchip details, Quarantine accommodation and Importer declaration must be completed by all applicants.

Rabies vaccination and Rabies Neutralising Antibody Titre Test (RNATT) Declaration must only be completed if importing an animal from a category 4 or 5 country. An official veterinarian of the government of the exporting country must complete this form. There is no need to complete the RNATT declaration if you are importing an animal from a category 2 or 3 country.

Application for Permit to Import Quarantine Material
 COMMONWEALTH QUARANTINE ACT 1908, Section 13

Giving false or misleading information is a serious offence

AQIS is collecting the information on this form to enable a quarantine assessment of the product named to be undertaken and to determine if an Import Permit may be granted. Its collection is authorised under the *Quarantine Act 1908*. Please note that the information provided in this application may be provided to other agencies as authorised/required by law. This may include (but is not restricted to): Biosecurity Australia, Product Integrity and other organisations within the Department of Agriculture, Fisheries and Forestry (DAFF); The Department of Health and Ageing (including Therapeutic Goods Administration (TGA) and the Office of the Gene Technology Regulator (OGTR) for the purpose of ensuring compliance with the Gene Technology Act 2000); Food Standards Australia New Zealand (FSANZ); Australian Pesticides and Veterinary Medicines Authority (APVMA); Department of the Environment and Heritage; Australian Federal Police; Australian Customs Service.

This may include (but is not restricted to): Biosecurity Australia, Product Integrity and other organisations within the Department of Agriculture, Fisheries and Forestry (DAFF); The Department of Health and Ageing (including Therapeutic Goods Administration (TGA) and the Office of the Gene Technology Regulator (OGTR) for the purpose of ensuring compliance with the Gene Technology Act 2000); Food Standards Australia New Zealand (FSANZ); Australian Pesticides and Veterinary Medicines Authority (APVMA); Department of the Environment and Heritage; Australian Federal Police; Australian Customs Service.

Official Veterinarian declaration

The RNATT Declaration must be completed when importing animals from a category 4 or 5 country. The declaration must be completed, signed and stamped by an Official Veterinarian of the Government of the exporting country. An Import Permit will not be issued if any part of this declaration is blank.

I, _____ (Name of Official Veterinarian),

employed by _____

 (Address of Official Veterinarian)

declare that I have sighted the rabies vaccination certificate and the RNATT report.

The date of the last rabies vaccination is recorded as: _____ (day/month/year).

The animal's age at the last rabies vaccination was: _____

The laboratory reporting the RNATT is government-approved: **Yes**

Name of government-approved laboratory: _____

Address of government-approved laboratory: _____

The microchip number that appears on the RNATT report is: _____

Blood samples taken for RNATT were drawn on: _____ (day/month/year)

The RNATT result is recorded as: _____ International Units/mL in animal's serum

Note: the RNATT result must be at least 0.5IU/mL

Signature of Official Veterinarian

Government stamp of Exporting Country

Date Signed
 (day/month/year)

Note: Faxed applications must bear the ink of the Government stamp rather than a raised seal

Prior to forwarding to AQIS, please ensure that this document is:

- signed and stamped by an Official Veterinarian of the government of the country of export Yes
- accompanied by an application to import cats and/or dogs (including disability assistance dogs) Yes
- accompanied by a copy of the RNATT laboratory report Yes

Information

Australian Quarantine and Inspection Service ('AQIS') veterinarians examine your animals for signs of exotic diseases soon after their arrival and just before their release from quarantine. In checking for exotic diseases they also rely on the constant observations of the experienced and trained kennel staff caring for your animal while it is in quarantine.

AQIS veterinarians, who normally only visit the Quarantine Station twice per week, **do not attend or treat animals for any other conditions.**

If concerns arise as to your animal's health which relate to a non-exotic disease, these must be dealt with by a private veterinarian.

The Quarantine Station's policy is one of seeking the early advice and prompt attendance of a private veterinarian rather than wait until a major problem develops.

If staff believe attendance by a private veterinarian is desirable for the health and welfare of your animal, they will try to contact you and inform you of their decision regarding veterinary consultation. However, there may be occasions when staff are not able to contact you.

The costs of attendances and treatments by private veterinarians are **not part of the AQIS cost** for quarantine. They are an additional cost to be borne by you. You will be billed separately by the veterinary practice.

To enable the station to arrange for a private veterinarian to attend your animal and ensure your payment of the services of the veterinarian, please complete the authorisation overleaf.

Authority for Private Veterinary Attendance and Treatment Declaration

Declaration

If, in the opinion of AQIS, my animal(s) require(s) veterinary attention whilst in quarantine, I authorise AQIS to arrange attendances and any necessary treatments by a private veterinarian on my behalf.

1. I acknowledge that while AQIS will try and contact me prior to arranging any such attendances or treatment, this may not always be possible and authorise AQIS to arrange for such attendances and treatment without prior consultation with me.
2. I agree I am responsible for the payment of all costs and expenses associated with attendances and treatment by a private veterinarian and will pay all fees due to the private veterinarian prior to the release of my animal(s) from the Quarantine Station.
3. I agree to indemnify AQIS against all expenses, losses, damages and costs (on a solicitor and our client basis and whether incurred by or awarded against AQIS) that AQIS may sustain or incur as a result, whether directly or indirectly, of the attendance and treatment of my animal(s) by a private veterinarian.
4. I agree to release AQIS from all actions, suits, claims or demands of any nature together with all costs and expenses incurred in respect thereof which I may have against AQIS arising in any way out of the attendance and treatment of my animal(s) by a private veterinarian.
5. I agree AQIS means the Commonwealth of Australia (Commonwealth), as represented by the Australian Quarantine and Inspection Service and includes officers, employees and agents of the Commonwealth.
