PROJECT FINANCING

Our **Chemicals and Petroleum Business Unit** invites skilled individuals to join its team in **Calgary**, and work on domestic or international projects.

Engineering Managers (Ref. 10992)

Expertise in managing multi-discipline, engineering teams on oil and gas projects from conceptual through to EPC. APEGGA registered or eligible.

Project Engineers (Ref. 11003)

Expertise in EPC projects, responsible for full scope, project deliverables costs and schedule. APEGGA registered or eligible.

Process Engineers (Ref. 11006)

Experienced in gas processing and/or SAGD. EPC experience of 5 to 15 years. APEGGA registered or eligible.

Senior Mechanical Heat Transfer Engineers (Ref. 10991)

Minimum of 8 years of experience in EPC industry for direct Fired Heaters and Large Package Boilers. APEGGA registered or eligible.

Senior Mechanical Rotating Equipment Engineers (Ref. 10990)

Minimum of 8 years of experience in EPC industry in Gas and Steam Turbines, Process Gas Compressors, High Pressure Process Pumps. APEGGA registered or eligible.

Piping Engineers (Ref. 10989)

Experienced in plot layout development of process facilities, piping material selection, requisitioning, stress checking of new and existing piping systems, including pipe support selection. APEGGA registered or eligible.

Lead Instrumentation Engineers (Ref. 10994)

Experience in refineries, gas processing and fractionation. APEGGA registered or eligible.

Project Managers (Ref. 11004)

Experienced in full scope of EPC project management. APEGGA registered or eligible.

Senior Instrumentation Specialist (Ref. 10997)

Extensive experience with field instrumentation. APEGGA registered or eligible an asset.

Piping Material Specialists (Ref. 10993)

Expertise in piping material description and application of relevant specifications to support material purchasing and quantity control. Responsible to develop material quantities in support of bulk estimation through to final quantities.

Plot/Equipment Layout Specialists (Ref. 10995)

Experience in the requirements related to process, safety and economics in the development of oil and gas process plant plot plans.

CADD System Administrators (Ref. 10996)

Experience in the administration, configuration and set-up of AutoCAD and MicroStation, Plant Design Systems (PDS), AutoPlant, Plant Design Management Systems (PDMS), SmartPlant 3D and SmartPlant Reference Data.
