LARAHTX (Info)

**To the British High Commission, to whom it may concern,**

This letter is to confirm that I, LARAHTX am married to (\_\_\_\_). We met in person through a mutual friend while I was visiting England in March 2013. We met on door to door ministry as we call it (We are CHRISTIAN) on March 13<sup>th</sup>, 2013 and began getting to know each other from April of 2013 until January 2019; when we finally decided to close the distance and move our relationship to the next level with the blessing of God and our family.

We were engaged March 11, 2019 whilst he visited the United States. We decided to marry on July 15<sup>th</sup>, 2019. We had a very intimate wedding with just close family and friends present. In the coming week, we flew over to England so I was able to meet his extended family.

However due to religious reasons we were not permitted to live together even while courting (as mentioned above we are CHRISTIAN.) It is against our moral code to live together as unmarried partners. Please keep in mind that we have been separated in the past due to religious purposes; it's in our hearts desire to finally be able to live together as man and wife now that we are married.

(\_\_\_\_) and I have been flying to see each other as often as we can due to both our work schedules, my previous college schedule and as our income allowed. He is my best friend that I can tell anything to without the fear of being judged. (\_\_\_\_) has even learnt the Spanish language to be able to communicate with my family. Which means the world to me as seeing my family and my husband get along and being able to speak warms my heart. We speak every day on facetime and through whatsapp. Both of us are glued to our ipads at night as we "Sleep" together, even with the 6 hour time difference. We both make sacrifices that we wouldn't otherwise have to if we lived in the same country.

It is extremely difficult being away from my husband. It causes great distress not being able to hug my partner or even being able to hear a caring word when I need it the most. You know like after you've had a bad day? There's nothing like your partners physical touch. (\_\_\_\_) has been such an amazing and understanding husband throughout the entire relationship. This is something that we hope to cross off the list.

I am currently working as a full time clinical float. I work in the medical field for a large hospital corporation (HOSPITAL INFO.) I would like to continue my studies to become a fully enrolled nurse. I love helping and caring for people, it is something that gives me purpose; I plan to continue when I move over. I have included my health documents which include: tuberculin screenings, flu injections, blood work and yearly physical. As to show that I am in good health.

It is my greatest hope that we have provided all the information needed so that our application is straightforward and complete. If there is anything else that is needed please don't hesitate in contacting either of us. We would greatly appreciate it.

Kindest Regards,
